```

Chosen emotion: sadness

Blob points: r: 26 -> r:30 radius so that when adding more points the blob doesn't shrink too much

Wobble freq: 0.9 -> 1.0 to look watery/teary

Increased gravity to represent being weighed down

Background: changed from white to a greyish purple to signify a gloomy atmosphere

Platforms: changed to dark purple to match the background

Blob: changed to dark blue to represent "feeling blue"
